APISec university course vs lab completion

The screenshot shows the APISec University website. The top navigation bar includes the APISEC UNIVERSITY logo, links for "My Courses", "Resources", and "Search", and a user profile icon. The main banner for the "API Penetration Testing" course features a "Start Course Over" button. Below the banner, a text box describes the course content, and a progress indicator shows "37 of 37 Lessons Completed".

API Penetration Testing

Start Course Over

The API Penetration Testing course provides hands-on instruction on testing APIs for security flaws. Participants in the course have learned specific, detailed tools and techniques for analyzing, testing and identifying API vulnerabilities. The skills learned include API reconnaissance, scanning, auditing JSON Web Tokens, performing authentication and authorization attacks, and exploiting other common API weaknesses like injection, mass assignment, and server-side request forgery. (Earn 12 CPEs)
