

Lab: SQL injection vulnerability allowing login bypass

Lab: SQL injection vulnerability allowing login bypass

APPRENTICE

LAB

Solved

This lab contains a SQL injection vulnerability in the login function.

To solve the lab, perform a SQL injection attack that logs in to the application as the `administrator` user.

ACCESS THE LAB

to solve this lab we should access the login page to admin panel as an admin by injection a simple sql code on the user login box

insert ' OR 1=1 - - in the username place and type what ever we want on the password field

then it will let us access to the admin panel without any validation

Congratulations, you solved the lab!
